

## Teacher Benefits

DataMap enables you to do your job faster and more efficiently, and helps you make sure students are never in danger of “falling through the cracks.”

- Access student demographic, attendance, intervention, and assessment information in real time
- View all student data individually or in sub-groups in one location
- Compare all student assessment data along with marking period grades
- Correlate prior results with current status to guide future instruction
- Recommend and create new student interventions, including RIMPs
- Easily monitor intervention progress
- Collaborate online with colleagues to create student learning objectives (SLOs)

## District/Administration Benefits

Say goodbye to information silos! Everything you need is right at your fingertips.

- District, third-party, and state assessment data spanning multiple years consolidated into one location
- Identify trends and track student progress with analytics tools
- Quickly and easily communicate assessment results to entire district
- Identify which assessments are best predictors of students’ success
- Enroll groups of students into customizable intervention programs
- Track student discipline
- Create uniformity across the district
